# SIM card may be made a must to use WhatsApp

**JATIN GROVER** New Delhi, May 18

WHATSAPP IS MULLING an update wherein users can use the instant messaging app only if a mobile phone has a SIM card.

The solution proposed by the department of telecommunications (DoT) to the Meta-owned company is aimed at curbing financial fraud, spam calls and and impersonation, according to people aware of the matter.

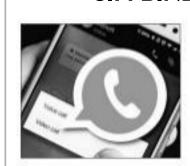

Currently, first-time users of WhatsApp can only use the app after verification that is, either by receiving a call or message on the phone number entered.

However, after the verification is done, even if users remove the SIM card from the phone then also they will be able to use WhatsApp for messaging and calling by using Wi-Fi. Further, there are websites which also offer fake numbers, using which WhatsApp can be operated.

"We have had many discussions with WhatsApp to introduce a SIM binding-like kind of feature wherein they do periodic audits to check if a phone has a SIM card in it or not," a govern-

# SIM BINDING SOLUTION

■ SIM binding means pairing devices such as smartphones to the SIM card

■ There are websites offer fake numbers, using which WhatsApp can be operated

ment official said, adding that the focus is to control WhatsApp impersonation and other type of financial frauds.

SIM binding means pairing devices such as smartphones to the SIM card. The technology, which is largely used by banks, uses a combination of SIM detection and SMS/call verification that validates the user's cell phone number against the one that is registered with the bank. The technology is used largely for security purposes.

Recently, The Indian Express reported that there are publicly available free websites such as receive-smss.com, sms24.me that allow you to choose from phone numbers of any country and use them on services such as WhatsApp that require a one-time password (OTP) to start an account.

"The idea within the government is to block fraud WhatsApp accounts and phone numbers after due diligence and verification so that the fraud can be stopped even before it originates. We will have to see how WhatsApp is able to act on the proposed SIM binding feature or comes with other solutions," another government official said, adding the government also shares the numbers issued on fake IDs with WhatsApp and the company is acting on the government's request.

Going forward, there might be an internal portal wherein the DoT will update the list of fake mobile numbers for easy coordination with WhatsApp.

THE RISING HEATWAVE in India soared the country's peak power demand to a new high of 2,21,076 MW on Wednesday as per the Grid Controller of India Ltd, raising concerns about power shortages as temperatures continue to rise.

Of course, power minister RK Singh maintains that the country is well prepared to meet the additional demand and that there will be no major outages.

The peak demand beats the previous record of 2,11,856 MW last summer on June 10, 2022. It is 4.4% higher than the peak power demand of last year. It also crossed the peak demand of 2,15,882 MW met on April 18 this year.

The increased demand for power raised the average market clearing price to Rs 7.51 per unit on the Indian Energy Exchange at peak time of 14:50 hours.

The India Meteorological Department (IMD) said that maximum temperatures were in the range of 40-44 degree Celsius over many parts of northwest, central, east and north peninsular

It further projected that heatwave conditions are likely to prevail over south Uttar Pradesh, west Rajasthan

and north Madhya Pradesh during May 20-22.

"Due to humid air and high temperature, hot and discomfort weather is very likely over Bihar, Jharkhand, Odisha and Konkan and Goa during next five days and over coastal Andhra Pradesh, Rayalaseema, Kerala and Tamil Nadu during May 18-20," IMD said in a statement.

The government has estimated the peak power demand to reach 230 GW this summer.

The government has taken several steps to ensure that there is no repeat of the power outages as it happened in 2022 summer. It has asked all gencos to operate at full capacity, and ensured adequate availability of coal to them.

According to Central Electricity Authority's daily coal data update, as on May 17, out of the 180 thermal plants across the country, 50 plants have coal stocks that are at critical levels.

Out of the 50 plants having critical coal stock, 31 are based on domestic coal, seven are designed on imported coal, seven are currently not in operation and five are plants based on washery rejects.

# GAIL Q4 profit falls 77.5% to ₹604 cr

**MANISH GUPTA** New Delhi, May 18

**COUNTRY'S LARGEST GAS** distributor GAIL India Ltd reported a 77.5% decline in its standalone net profit to ₹603.52 crore in quarter ending March due to weak performance in its petrochemicals segment.

GAIL had earned a net profit of ₹2,683.11 crore in the corresponding fourth quarter of FY22. The revenue from operations went up from ₹26,968 crore in Q4FY23 to ₹32,858 crore in Q4FY22.

The company earned the highest ever annual revenue of ₹1,44,302 crore in FY23, up 57% from ₹91,646 crore in FY22. However, the net profit for full fiscal fell 49% to ₹5,302 crore in FY23 from ₹10,364 crore in FY22.

GAIL chairman and MD Sandeep Kumar Gupta said that higher expenses due to adverse prices of natural gas and disruption in long term contracts affected all the verticals of the business, particularly the petrochemicals segment.

Barring LPG transmission service, profit before interest and taxes fell y-o-y in all segments -- natural gas transmission service, natural gas marketing, LPG and liquid hydrocarbons, and petrochemicals actually resulted in a loss of ₹1,061 crore in FY23, as per the company's financial results. The petrochemicals seg-

ment of GAIL saw a 42% decline in sales from ₹8,549 crore in FY22 to ₹4,917 crore in FY23. "The company has incurred its highest of about ever capex ₹9,100 crore during FY23 mainly on pipelines, petrochemicals, equity to JVs, etc. which is 15% higher than annual target of ₹7,918 crore,"Gupta said.

GAIL has planned a capital expenditure of ₹10,000 crore in FY24, he said and added that the company has a comfortable debtequity ratio and hence do not see any problem in raising funds.
